LABTICIAN™ ophthalmics Since 1959

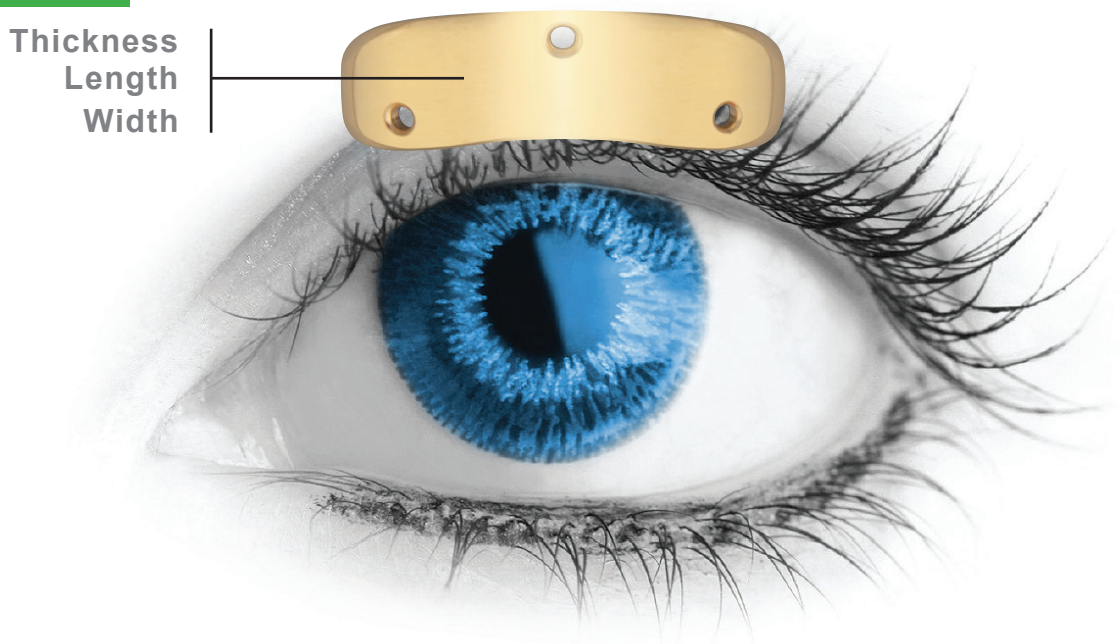
Bringing innovation to practice.

Proportional™ Lid Loads

LAB™ LidLoads

The next generation of gold eye lid weights that provide corneal protection with enhanced cosmesis

A 3-dimensional solution for the treatment of Lagophthalmos



account all three dimensions **(thickness, length and width)** to fit your patient's needs precisely.

- **Thickness** - thinner in the low weight range for patients with smaller and thinner lids
- **Length** - shorter at the high weight range where managing length is important
- **Width** - rounded perimeter and corners for enhanced cosmesis
