

# NEW PRODUCT RELEASE

**Date:** October 15, 2021

**Product Name:** ACTU8 End-Grip Forceps

Vortex Surgical is delighted to add to the ever growing ACTU8 Disposable Forceps line with the 23ga and 25ga End-Grip Forceps. This is the fifth tip design in the ACTU8 portfolio and has the potential to be the most popular!

Vortex has worked on the End-Grip design for close to two years with multiple KOL's trying to perfect the design to give retinal surgeons added benefits while utilizing the device. The key to the End-Grip design is surgeon visualization. While all of the ACTU8 tip configurations were designed with visualization in mind, the End-Grip design maximizes it for the surgeon. With the fine, slightly radiused "point" on the forceps, the surgeon is able to better visualize their target tissue compared to other forcep designs.

The End-Grip Forceps was also designed with precise alignment criteria giving the surgeon reliable tip closing time after time. The tip grasping force was also optimized for tissue grip without the fear of shredding membranes. The proprietary texturized finish on all ACTU8 forceps provides maximum grasping force.

An additional benefit we found with the End-Grip Forceps in our extensive clinical testing was membrane dissection. The End-Grip design allowed for easier dissection of membranes when placed in the appropriate location on the membrane in the closed position. When opened, the fine point tips provide dissection with most membranes.

As with all of our ACTU8 forceps, the handle is a highly responsive, low profile design. The 8 individual levers provide 360° of ACTUation. The removable back cap on each forceps also gives the surgeon greater access in myopic eyes. Each ACTU8 Forceps has a glare-free shaft and provides the surgeon the control and consistent performance that they demand on each and every case.

## **Key Product Benefits:**

- Enhanced visualization of target tissue
- Maximized grasping force without the fear of membrane shredding
- Precise tip alignment
- Easier dissection of membranes

**Product Catalog Number:** VS0743.23 - 23ga ACTU8 End-Grip Forceps  
VS0743.25 - 25ga ACTU8 End-Grip Forceps  
Sterile, Disposable, 5/box
